GASTON NAHUEL PONCE

PRODUCT OWNER

📍 Buenos Aires, Argentina | ✉ NahuelG.Ponce@gmail.com | 🔗 /gastonponce | 📞 +54 9 11 3766-9897

Experience in software development as a project leader. I also worked as a functional analyst and front-end developer. I adapt quickly to new projects, challenges, and technologies required by the position. I work under pressure in leadership positions, justifying and negotiating timelines with stakeholders.

WORK EXPERIENCE

ProductOwner | Agrology Data S.R.L.   **April 2022 - Present**
- Team leader across multiple areas (front, back, and UX) to maintain and deliver continuous improvements.
- Sprint planning, scheduling, and progress presentation to the board.
- User Story documentation with acceptance criteria and test plans.
- API testing with Postman and documentation for integrations with external systems.
- Automated testing with Playwright/Selenium.
- Design screens with Figma and layout in HTML/CSS/JS.

Functional Analyst | ELDAR   **May 2021 - April 2022**
- API testing with Postman and third-party API documentation for integrations.
- Development of technical and functional documentation focused on financial transactions.
- Sprint planning and scheduling.
- Design, improve, and test web and Android projects focused on facilitating financial transactions using Figma, HTML, and CSS.
- Development of Python scripts for handling large volumes of data in JSON/CSV/XLS formats.

Functional Analyst - FrontEnd Angular | Mobile-I-Business   **December 2019 - May 2021**
- Front-end development in Angular, AngularMaterial, Routing, NgRx.
- Requirements gathering and development of functional documentation.
- User Story documentation with acceptance criteria and test definition.
- KPI creation in Google DataStudio to measure usability and product quality.
- Diagram creation (BPMN, primarily UML).
- Reviews, quality controls, and ISO 9001 compliance.

EDUCATION

Licenciatura en Sistemas   **March 2021 - Present**
Universidad de Lanús
- Object-Oriented Programming: Paradigm theory, Java, DB connections, Hibernate, SpringBoot, and security. Build put, post, delete, and get APIs in Java. SQL and NoSQL DBs: construction, standardization, and maintenance.
- Non-functional quality requirements, ISO 27001 / ISO 9001

ADDITIONAL INFORMATION
